OUR MISSION

"Provide the most secure facility (if you visit us, you'll understand why we say that), along with the lowest price and widest range of services available in the web server CO-LO industry."

From classes to on-site parts to 24/7 sales and services, when you want a team with 30 years in the business, there's only one place on Earth to go: **Big Drive Hosting**

*Complimentary
Limousine Service
from SFO for [Gold
Club Members](#)*

*New to web hosting?
We're here to teach
you the skills and*

LOWEST CO-LO PRICE - GUARANTEED!

(based on National Survey)

Sales:

- CO-LO rack space starting at \$50/month
- New and Used 1-U, 2-U and 4-U web servers and larger and smaller units, starting at \$100 - rent or own
- New and Used PCs and Laptops - available through the [KCK youth programs](#).
- Virtual hosting starting at \$5/month - subject to site content [approval](#).
- Custom Software Applications while you wait. If you've never seen 20 software engineers, analysts and accountants finish a 6 month software application in under 8 hours, you haven't lived.
- VOIP equipment, Digital Sensors, Digital Security Cameras, Robotics, cases, motherboards, drives and more. The largest pile of new and used parts in the Bay Area (including Silicon Valley).

Parts:

- New and Used motherboards, drives, cases, monitors and printers. All proceeds go to KCK (Kids Computer Kamp) labs in schools, youth centers and family agencies.
- Pick up and delivery service: need a new drive or motherboard for your server? There's no charge for us to order it for you

Services:

- CO-LO rack space starting at \$50/month
- Virtual (shared) hosting starting at \$5 per month ([content approval required](#))
- VOIP services - ([learn more](#))
- Free Remote Monitoring, Remote Server Console, Firewall, E-Mail POP/SMTP Server, Antivirus and Web Content Harvesting Software
- Classes where you can learn to build your server, build your web sites and plan, develop and host your own content. Free for kids 18 and under, single parents and seniors (through the KCK youth programs). \$50 for all others.
- Web Publisher's Club: learn what it takes to be a Web Publisher with experienced professionals guiding you through each step. Meetings are free to all one year prepaid members or \$100 on a drop-in basis.
- Custom File Conversion Applications from Windows to MAC to Unix, from COBOL to Oracle, from Word and HTML to PDF. Whatever you need converted to another platform, we can usually do it *while you wait* and you keep the code when we're done.
- Offices and Conference Room to meet clients. Onsite vault, secure mail drop, forwarding and ship and receive services. *You don't have to drive your server to us unless you want to drop by the club and enjoy a complimentary slice of pizza.*

ABOUT US:

In 1979 we began offering drive space and data warehousing services on mainframes and for 30 years have provided large institutions with multi-tiered, multi-platform hardware and software solutions to integrate PC networks, legacy and Unix/Solaris systems with a variety of operating systems. We still offer competitive pricing on software and hardware development and Maintenance, including COBOL, FORTRAN, C and C++, Java, Oracle, Oraperl, SQL, MySQL, DB2, Clipper/dbase, Sybase, PHP, HTML, XML, Apache and other languages. Applications we've developed run nuclear power plants, hospitals, HMOs, Banks, Law Firms and large Brokerages. We can probably develop your applications faster than your own software team was doing it and do it for less.

Now all of these hosting and software services are available to smaller companies and start-ups. Through our on-site class series presented by KCK, anyone can learn to run their own CO-LO server and become a 'web publisher'.

Our software and hardware is robust!

EXAMPLE: one of our clients uses our invoicing software to link several hundred offices around the world and produce over \$360 million per month. The system ran for seven years, never needed a patch or repair or upgrade and at no time did any user touch a single key.

*show you the ropes.
Consider attending a
class where you'll
learn everything you
need to jump into
worldwide publishing
with both feet at a
price you can afford.*
